## PROFESSIONAL EXPERIENCE

---

### **Yana Motion Labs**

Calgary, AB  
2023 - Present

#### Senior Software Engineer (Contract)

- Rebuilt the company website end-to-end with a modern accessible, performance-first stack
- Designed and deployed AI pipelines to generate biomechanical insights from user data; built internal tooling to operationalize models within clinician workflows under HIPAA-aligned governance (RBAC, encryption, audit logs, PHI segregation)
- Led technical SEO program (Core Web Vitals, schema, sitemaps/robots, internal linking, lighthouse) driving organic growth across 5+ target keywords

### **DataTrail Corp.**

Calgary, AB  
Feb 2021 - Jul 2025

#### Senior Software Engineer

- Engineered the core GIS software interface, architected to handle hundreds of thousands of concurrent requests at 99%+ uptime and is still running stable in production
- Built end-to-end IoT integrations from device firmware through server to UI, aligning hardware data pipelines with a performant React frontend; mentored junior developers on server-side architecture and production deployment best practices
- Modernized legacy .NET/C# and React codebases with targeted refactors; introduced CI/CD pipelines and migrated payment infrastructure from PayPal to Stripe, improving reliability and maintainability
- Reduced change lead time by 35% by expanding automated test coverage across critical GIS microservices

### **Enviros**

Calgary, AB  
Jun 2024 - Apr 2025

#### Senior Software Engineer (Contract)

- Architected a secure multi-tenant MySQL/Drizzle platform with granular RBAC, encryption at rest, and full audit trails for HIPAA-aligned handling of sensitive children's data
- Translated complex clinical requirements into intuitive CANS-aligned interfaces; built analytics dashboards for outcomes, compliance, and trends
- Reduced assessment completion time by 45% and cut reporting from 3+ hours to under 90 minutes through workflow automation and UX improvements — delivered with TDD and zero post-handoff bugs

### **OnGuard**

Calgary, AB  
Jun 2016 - Jan 2021

#### Backend Developer

- Designed and maintained Node.js REST APIs and microservices with automated deployments and robust observability
- Collaborated cross-functionally to integrate third-party services and scale data processing workflows
- Reduced API P95 latency by 20% using caching, query tuning, and async job queues
